Summary

Computer Science graduate with hands-on experience in developing and deploying responsive web applications using HTML5, CSS3, JavaScript, and React.js. Skilled in building frontend applications from scratch, with a strong foundation in problem-solving and with clean and maintainable code. Currently enhancing backend development skills with FastAPI and MySQL to build full-stack expertise. Seeking a Frontend Developer role to contribute to impactful projects while continuing professional growth.

Skills

- **Languages -** Python, Java, JavaScript(ES6+)
- **Frontend -** HTML5, CSS3, React.js,
- **Backend -** REST API, FastAPI, SQLAlchemy, JSON
- **Databases -** MySQL, MongoDB
- **Tools -** Git, GitHub, Postman

Education

- **Mohan Babu University** 2022 - 2026
  B.Tech - CSE | CGPA:7.88
- **Sri Gowthami Jr College** 2020 - 2022
  Intermediate | Percentage: 85%
- **Sri Sai High School** 2019 - 2020
  SSC | Percentage: 86%

Projects

- **TaskManager | Tech Stack: HTML, CSS, JavaScript** Live | GitHub
  Built a full-featured Task Manager using HTML5, CSS3, and JavaScript by implementing 5 core features: task creation, deadline tracking, status updates, priority filtering, and reminders.Engineered a client-side reminder system using JavaScript timer functions, delivering deadline alerts with zero backend dependencies.Deployed live on GitHub Pages with a fully responsive, mobile-first UI optimized for all screen sizes.

- **CineBase API | Tech Stack: Python, Fast API, Mysql** Live | GitHub
  Developed a RESTful CRUD API with FastAPI and SQLAlchemy ORM, enabling actor record management through MySQL database. Designed 7 REST endpoints to support filtering by ID, first name, and last name, with query parameter-based pagination for flexible data retrieval. Applied Pydantic schemas for input validation and leveraged dependency injection for clean database session handling across all endpoints.

- **Skyline | Tech Stack: HTML,CSS, JS,Weather API** Live | GitHub
  Engineered a multi-city weather dashboard using HTML5, CSS3, and vanilla JavaScript, consuming the OpenWeatherMap API to retrieve real-time temperature, humidity, wind speed, and weather conditions for any searched city.Constructed a dynamic card-based grid with 5 preloaded cities, generating each card via DOM manipulations, condition-based color themes, and duplicate city validation.

Internships

- **Web Development (ID:AN2/T10/01113)** Jan 2026 - Mar 2026
  Developed and deployed a responsive Task Manager application with 5 core features, improving task organization and deadline tracking through an intuitive user interface.

- **Generative AI Internship (ID:STU67760a93e77641735789203)** Jul 2025 - Sep 2025
  Completed a 10-week virtual internship through AICTE's National Internship Portal in partnership with EduSkills, with curriculum developed and delivered by Google Cloud; achieved an Outstanding (O) grade for coursework covering generative AI fundamentals and prompt engineering.

Certifications

- Web Development Fundamentals View
- Certificate for Python Essentials by Cisco View
- Certification for Prompt Design in Vertex AI issued by Google Cloud View
